

DB Developer (f/m)

Your tasks...

Your work as a DB Developer in professional international teams, possibly in direct contact with the customers' employees, and thoroughgoing support the team in the implementation of the technical concepts.

You advise our customers within the environment of your IT and business support systems regarding the conception, design, development and integration of new and existing systems whilst employing innovative IT technologies and services.

Your tasks furthermore include the analysis of existing business processes, soft- and hardware infrastructures, as well as the conception and implementation of software architectures, taking into account the customers' professional and technical requirements. In doing so, you will access industrial standards and current trends in order to develop sustainable solutions and ensure their quality.

Your profile...

In addition to a degree in computer sciences or a comparable Training you have at least 2 years of experience in the development of database based solutions. You closely follow new technologies and innovative concepts.

Preferably, you have been able to gain substantial experience in the following fields:

- Database modelling (RDBMS)
- Oracle/DB2/Sybase
- PL/SQL
- Cluster operation
- Performance tuning

Ideally, you are also familiar with the Java and .NET technologies. You have very good analytical and communicative skills, work target-oriented and like to take the initiative and shoulder the responsibility in difficult situations.

If you are interested in joining an international and dynamic team, please send your resume in English with reference to the following e-mail address: job@axisplus.de
